Education

Master of Science (MSc) in Artificial Intelligence (with distinction), Sheffield Hallam University, Sheffield, United Kingdom. Feb 2025

Bachelor of Science (BSc) in Computer Science King Abdulaziz University, Jeddah, Saudi Arabia. Dec 2019

Research

My paper “**AI-Driven Abnormal Behaviour Detection within Crowds**” was accepted in the 30th ICAC conference and published in the proceedings.

<https://doi.org/10.1109/ICAC65379.2025.11196200>

- We developed a video anomaly detection framework integrating GNNs and Trajectory analysis.

Research Interests

Video Anomaly Detection, Graph Neural Networks, Knowledge Representation, Computer Vision

Teaching Experience

Cooperate Lecturer (Temporary Faculty Member) at Department of Information System, Faculty of Computing and Information Technology, Northern Border University, Saudi Arabia.

From Aug 2025 – Jan 2026: Full course instruction, curriculum delivery, and assessment of student performance.

I have taught the following course:

- **Artificial Intelligence:** Delivered lectures on fundamental AI concepts, search algorithms, knowledge representation, and machine learning basics. Designed and graded assignments and examinations.
 - **Database Administration:** Instructed students on database design (SQL), transaction management, and security principles.
 - **Data Warehousing & Data Mining:** Taught concepts of OLAP, data cube technology, ETL processes, and core data mining techniques (classification, clustering, association rule mining).
-

Technical Skills

- Python
- SQL
- Prolog
